SUCCESSION
EPISODE 1, SEASON 4
The Munsters

Chart shows each mention of a fuck-based word over the episode.

The script for this episode was extracted from the SubRip Subtitle (SRT) file that is used to create subtitles, so it handily includes a timestamp. This SRT file was parsed into a tidytext format using François Keck's **subtools** R package. After tokenising, I filtered to only include any fuck-based word.
